

Daniel Feddy

Software Engineer

Manchester, M25 0DU
United Kingdom
(+44) 7766220123
daniel.feddy0123@gmail.com

PROFESSIONAL SUMMARY

I have a strong background in HTML, CSS, and Javascript programming and have thus designed and built websites that are visually appealing, responsive, and highly functional, optimizing the user experience for both mobile and web applications. I also have a university-level background in backend development. I designed and constructed databases and familiarized myself with other programming languages, such as SQL, Java, and Python, in order to grow as a developer. I am proficient with React, Git, and a number of Microsoft software such as Access, Excel, Powerpoint, and SQL Server.

MY PORTFOLIO WEBSITE:

My portfolio website was designed to showcase my projects and skills. With a focus on a modern design, I utilised React.js and SASS to reach the result I hoped for. I implemented the Intersection Observer API whilst ensuring that the code was well-tested and clean.

WORK EXPERIENCE

AO Retail Limited - Junior Email Developer

Current

- Oversaw emails outgoing to 2 million customers on a daily basis
- Used SQL to retrieve information from the customer database to specify the desired recipients of emails
- Designed and constructed sophisticated email templates using HTML, CSS and AO's internal scripting language
- Liaising with Customer Relationship Management team and Design and Copywriting team to create innovative email concepts

David Samuels Properties - Archive and Records Manager

- Led the redesign and construction of a comprehensive archive management system, encompassing both physical and digital components.
- Conducted thorough research and provided valuable insights on cost-effective solutions to address operational constraints.

VOLUNTEERING EXPERIENCE

The Friendship Circle - Community Volunteer

- Engaged in volunteer work to support and spend quality time with individuals with special needs, fostering meaningful connections through games and conversation.
- Developed strong interpersonal skills and built relationships with intellectually disabled individuals through interactive activities and open communication as a dedicated volunteer.

SKILLS

Node.js, React.js, Git, Github, Microsoft Access, Microsoft SQL Server, Microsoft Powerpoint, Microsoft Excel, UX/UI Design, SEO, Web Design

LANGUAGES

HTML, CSS, Javascript, Java, Python, SQL

EDUCATION

Touro University Bachelor of Arts

Degree in Psychology

Bury College A-Levels

King David High School GCSEs
